

# A Directory of London's Improvement and Transformation Support Offers

*Helping you navigate the support available in addressing core challenges across the health and social care system*

*Edition 1, October 2018*

## About Healthy London Partnership

Healthy London Partnership formed in 2015. Our aim is to make London the healthiest global city by working with partners to improve Londoners' health and wellbeing so everyone can live healthier lives.

Our partners are many and include London's NHS in London (Clinical Commissioning Groups, Health Education England, NHS England, NHS Digital, NHS Improvement, trusts and providers), the Greater London Authority, the Mayor of London, Public Health England and London Councils.

All our work is founded on common goals set out in [Better Health for London](#), [NHS Five Year Forward View](#) and the [Devolution Agreement](#).

## About this directory

This directory offers a guide on what provision is available to you to support core challenges that you are facing within your organisation, across organisations or at a system level across a Sustainability and Transformation Partnership (STP) patch. This is to help you navigate current offers more easily, to find what is on offer and who provides that support.

You can search the directory by the problem or challenge, or by the clinical priority area. The directory provides high level information with hyperlinks to organisation's websites where you can find more detailed information therefore is best used online.

The information furnished within this directory has been taken from details published in the public domain and are accurate to the best of Healthy London Partnership's knowledge. Any inaccuracies can be reported via [england.healthylondon@nhs.net](mailto:england.healthylondon@nhs.net), please use the reference 'LITS directory' in all correspondence.

## **Contents**

### **Foreword**

#### **Part 1: What is the problem or challenge that you need support on?**

1. [Workforce: recruitment, retention, planning and skills development](#)
2. [Organisational development and leadership \(individual, system & place based\)](#)
3. [Patient and community engagement](#)
4. [Operational efficiency and cost reduction](#)
5. [Service re-design, integration, innovation, transformation and quality improvement](#)
6. [Business intelligence, data analytics, economics and financial modelling](#)
7. [Using digital and technological approaches](#)

#### **Part 2: What clinical priority area do you need support or advice on?**

1. [Urgent And Emergency Care](#)
2. [Mental Health](#)
3. [Cancer Care](#)
4. [Primary Care](#)
5. [Population Health And Prevention](#)
6. [Maternity](#)

### **Annexe of organisations listed in this directory**

# A Directory of London's Improvement and Transformation Support Offers

## Foreword

The NHS Long Term Plan and a five year funding settlement gives us a huge opportunity to transform that way we support the health and care of our fellow citizens and carers in the NHS, local and regional government, and the voluntary sector. Passive diffusion will not achieve this. Evidence shows that peer learning is the most effective model of change and can be enabled through learning networks, improvement science and communities of practice. No one method is superior to others, and experience shows that it is often beneficial to use several in tandem with an emphasis on using the public sector's own expertise.

This directory is designed to help you more easily navigate the range of improvement and transformation support offers available to you to support change within your organisation, across organisations or at a system level across a Sustainability and Transformation Partnership (STP) patch or regional area.

The directory is designed to be used by individuals, organisations and systems working across primary care, secondary care and mental health, as well as those focussed on integration of health and care and place based care.

Many of you will have existing support available through your own transformation support teams or quality improvement hubs. You may also have existing contracts or agreements with organisations named in this directory that you will continue to use. This directory adds to these offers, should you require any additional support or expertise that is not currently available to you.

Some of the support listed is free, may be part of an existing contract or comes at a cost. Given the range of different offers and organisations listed, it is not always possible to indicate this but this will be clear should you approach an organisation for support.

Whilst this directory does not include a totality of all offers in London, it does provide a comprehensive overview of key offers and organisations, and the ability to filter support by the challenge or problem you are facing; or by the clinical area within which you are

working. If you think your organisation should be included, please contact us via [england.healthylondon@nhs.net](mailto:england.healthylondon@nhs.net) (using the ref: LITS directory).

The system is changing and as such support offers will reflect changing needs and priorities. This directory will be updated within 12 months and in the meantime, we welcome any feedback ([england.healthylondon@nhs.net](mailto:england.healthylondon@nhs.net)) on how useful this directory is and any suggestions for its improvement.

We hope that you will find this directory useful.

Kind Regards,

**Dr Vin Diwakar**  
Regional Medical Director  
NHS England (London Region)

**Professor Oliver Shanley OBE**  
Regional Chief Nurse (London region)  
NHS England | NHS Improvement

**Shaun Danielli**  
Director  
Healthy London Partnership

### **Acknowledgements**

With thanks to all those who contributed to the directory.
