

Data Protection Impact Assessment (QRG)

1. What is a DPIA?

Article 35 of the General Data Protection Regulation (GDPR) refers to Data Protection Impact Assessments (DPIAs) as a tool which help organisations identify, assess and mitigate or minimise privacy risks with data processing activities. They're particularly relevant when a new data sharing or processing, system or technology is being introduced.

DPIAs also support the accountability principle, as they help organisations comply with the requirements of the GDPR and demonstrate that appropriate measures have been taken to ensure compliance.

2. When should a DPIA checklist be completed?

The GDPR mandates a DPIA to be completed where data processing "is likely to result in a high risk to the rights and freedoms of natural persons".

A DPIA should be completed as early as possible within any new project lifecycle, so that its findings and recommendations can be incorporated into the design of the processing operation.

Known as privacy by design, the embedding of data privacy features into the design of projects can have the following benefits:

- Potential problems are identified at an early stage.
- Addressing problems early will often be simpler and less costly.
- Increased awareness of privacy and data protection across the organisation.
- Organisations will be less likely to breach the GDPR.
- Actions are less likely to be privacy intrusive and have a negative impact on individuals.

3. How do I complete a DPIA checklist?

As a host of an ISA you can see a 'DPIA' column in the 'ISA – Registry' table which indicates the DPIA status for each ISA.

The screenshot shows the 'ISA - Registry' dashboard. The 'ISA - Registry' tab is highlighted in red. Below the navigation bar, there are several filter dropdowns: Agreement Title / Reference, All Status, All DPC Status, All Dpia Status, All Risk Rating, All Data Templates, All Data Sections, and All e-ISA Status. A 'Filter' button is visible. Below the filters, there is a 'Create New' button and a link to 'Click on the icon to see related organisations'. An 'Export to Excel' button is also present. The main table has the following columns: Title, From Date, To Date, Status, DPIA, Risk, Active, Pending, Incoming, Associated, Host, Pending, Active, Clone, and PDF. The table contains 7 rows of data.
