

What is the value of an online community in the diagnostic radiology and endoscopy pathways?

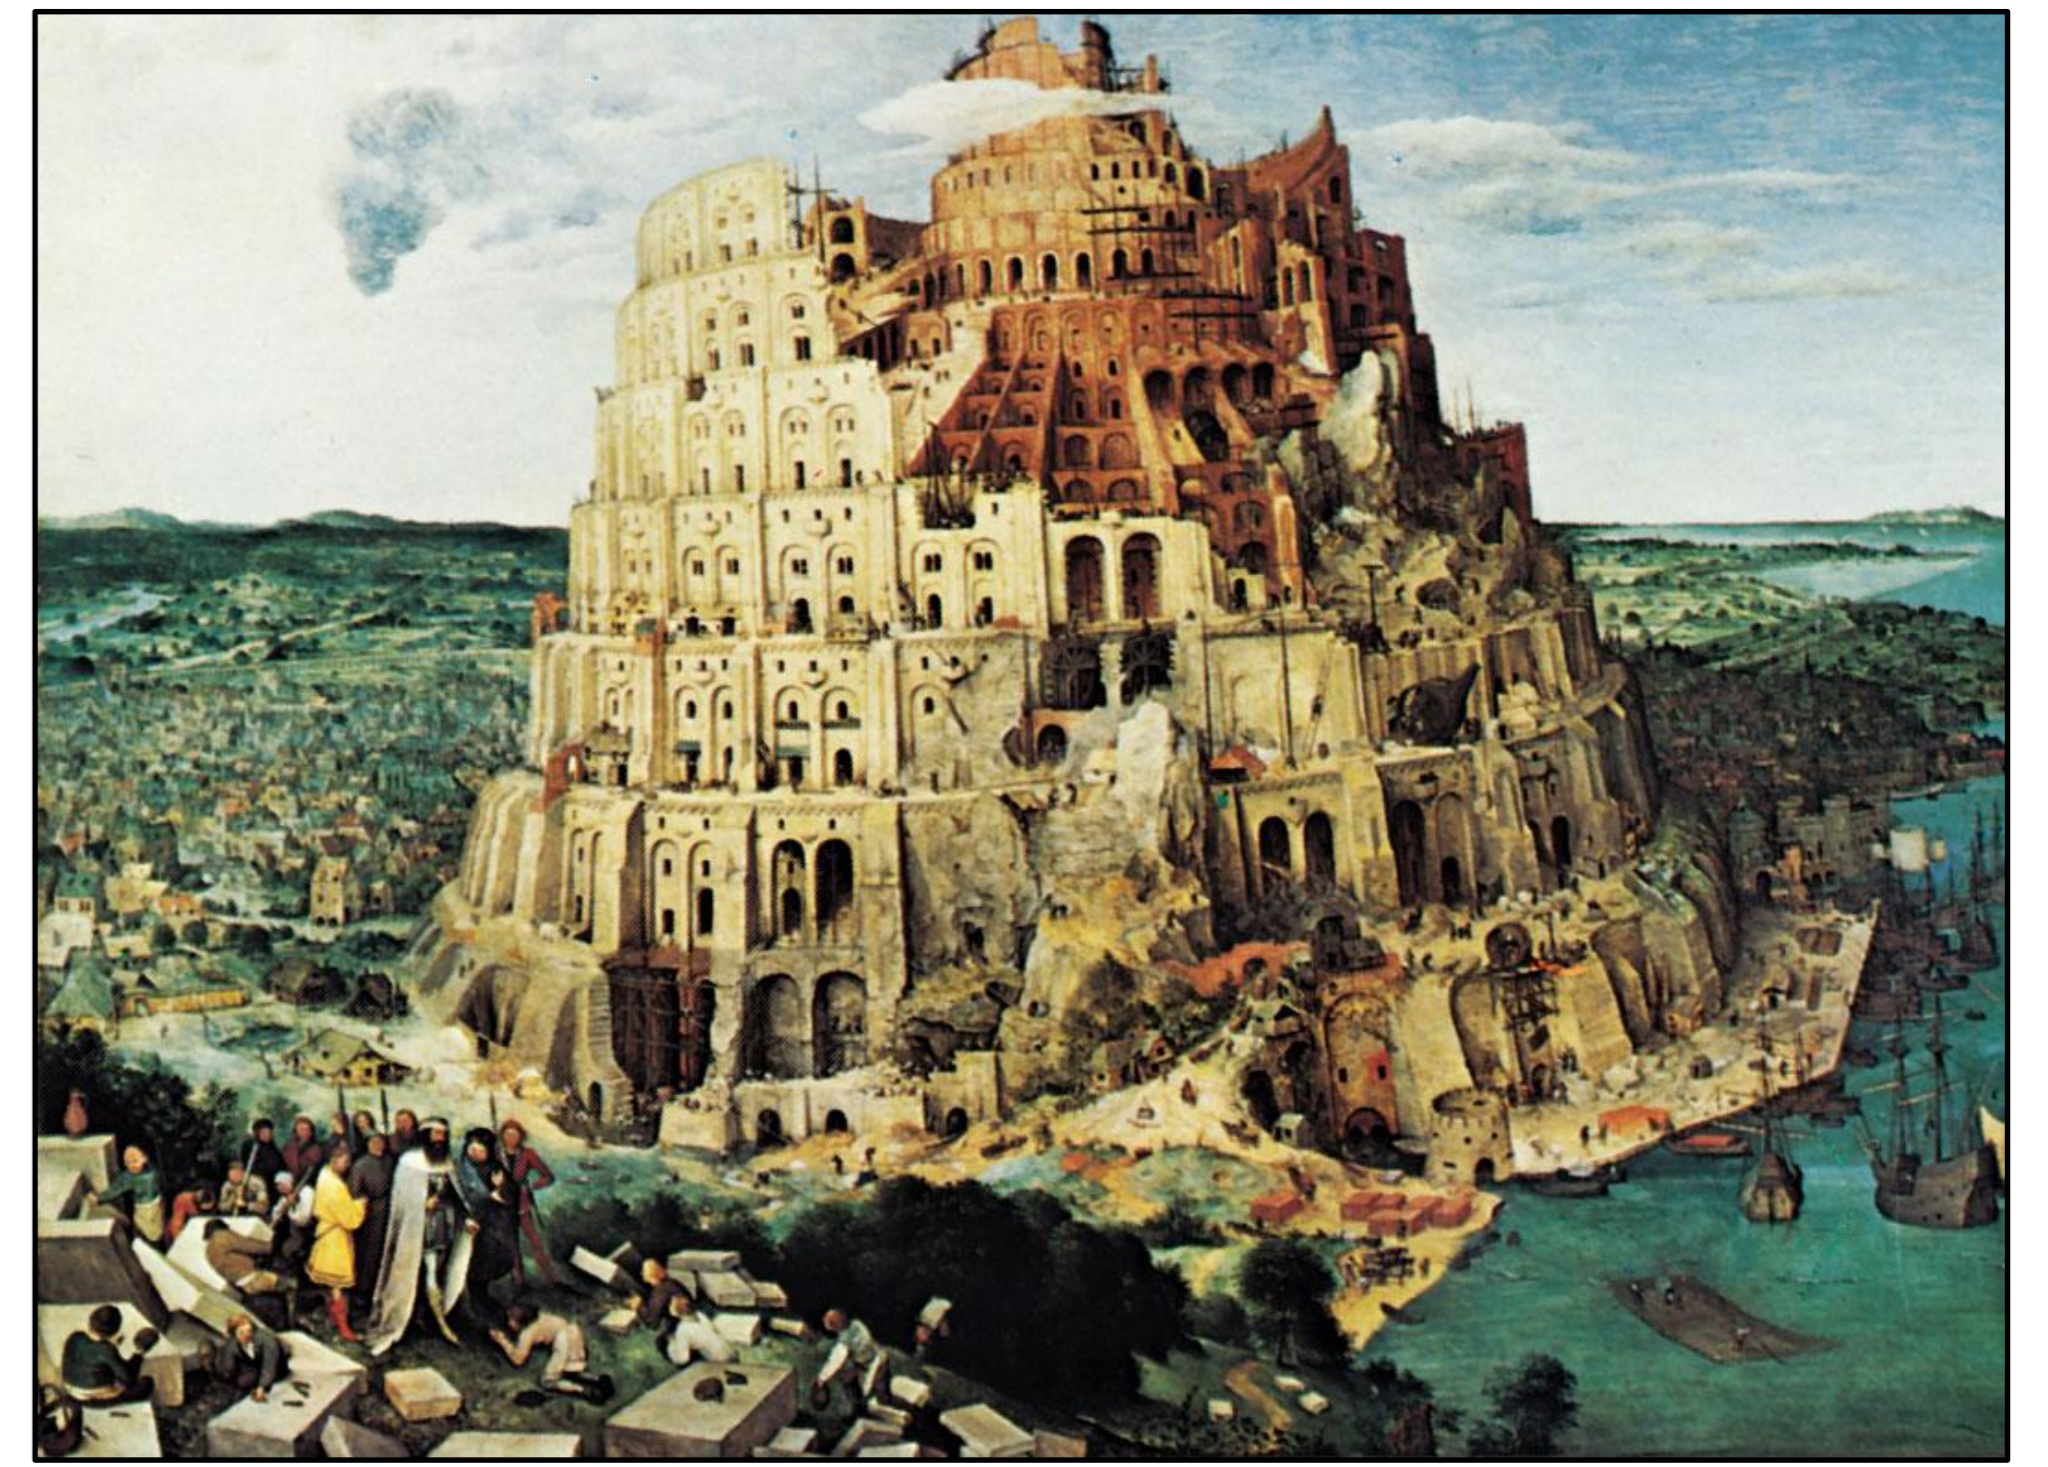

Chris Sibley-Allen, NHS London Healthcare Science Fellow
christopher.sibelyallen@nhs.net

Introduction

Successful online communities exist in our everyday lives ranging from social media, whatsapp chats, blogs and professional collaborations.

The success of an online community depends on shared goals, active members and value in shared information.

This fellowship project is investigating the value of a London region online community forum in diagnostic radiology and endoscopy cancer pathways.

How could an online community add value for staff and patients?

- Shared goal of optimising the healthcare system
- Space to share files and links?
- Sharing upcoming events, jobs, articles?
- A forum for sharing your optimisation work?
- Reducing variation in a healthcare system

Where could an online community be hosted?

- A secure online platform for NHS collaboration
- 360 existing NHS online communities
- Straightforward online space for storage
- Optional email notifications to stay up to date

Who would use an online community?

- Secondary care Professionals ?
- Primary Care professionals?
- Health Service Commissioners?
- Service Transformation teams?
- Workforce and IT Teams?

Could the diagnostic radiology or endoscopy pathway in London benefit from an online community?

Yes!

No!
