MAYOR OF LONDON

#AskAboutAsthma campaign 2020

Three key messages as in last three campaigns. CYP should:

- Have an annual review (as a minimum)
- Have a personalised asthma management plan
- Know how to use their inhalers effectively

A big change for this year – Covid

Keeping children's asthma under control is particularly important this year due to the coronavirus and any potential second wave

Future London > The Air We Breathe

How London's air pollution is impacting people with asthma and lung conditions

Pollution can be particularly dangerous for people with breathing problems. That's why charities are campaigning to change the law

NICOLA SLAWSON | Monday 21 September 2020 14:04

IN ASSOCIATION WITH

Mayor Sadiq Khan is this month supporting the Ask About Asthma campaign, which is asking organisations, businesses and residents in London to take simple steps to improve air quality such as having more greenery in and around homes and offices.

“Having developed asthma as an adult, I know how vital our work is to clean up our city’s toxic air and prevent many more Londoners becoming ill,” Khan says. ■

AskAboutAsthma campaign returns for fourth year

14 August 2020

The #AskAboutAsthma campaign returns for fourth year to improve the lives of young people in the time of Covid-19.

1 in 10 children and young people in London have asthma but less than half of these have an asthma management plan, or know how to use their inhaler correctly. Many have badly managed asthma, to the extent that 4,000 are admitted to hospital every year and 170 have such a severe episode that they require admission to intensive care.

A message from the Mayor of Tower Hamlets

London, 10 September 2020

Ask About Asthma - 14 to 20 September

The Healthy London Partnership is running their fourth Ask About Asthma campaign with the NHS from 14 to 20 September to raise awareness of the three simple measures that should be taken to help all children and young people with asthma.

One in 10 children and young people in London have asthma but less than half of these have an asthma management plan or know how to use their inhaler correctly. Many have badly managed asthma – to the extent that 4,000 are admitted to hospital with asthma every year and 170 have such a severe episode that they require admission to intensive care.

This September, [Health London Partnership](#) and NHS England (London), supported by the Mayor of London, are running their fourth public awareness campaign #AskAboutAsthma to encourage small steps to improve the quality of life for those living with asthma in London.

Keeping children's asthma under control is particularly important this year due to the coronavirus and any potential second wave.

The campaign aims to encourage health professionals, children and young people and their families to 'ask' for three

This is the latest round-up of information for GP practices, produced by South East London CCG. Should you have any questions or need advice, contact your local borough primary care team in the first instance, they will escalate anything they can't resolve to south east London's Coronavirus co-ordination centre.

A message from Mark Ansell

Director of Public Health, Haringey Council

Harrow Council

Asthma awareness

In this section

- 1 Asthma awareness
- 2 What to do if you have asthma

Asthma is the most common long-term medical condition affecting children and young people. There are about 2.3 million people with asthma in every classroom.

Statistics: 8% has information on Coronavirus (COVID-19) and children with asthma.

London sees 12 child deaths a year as a result of asthma and that sadly has included children and young people.

Across the UK, asthma affects 16 million people. Haringey Council and Harrow CCG are supporting the #AskAboutAsthma campaign which is focused on children and young people but is relevant for adults too.

#AskAboutAsthma campaign

Healthy London Partnership and the NHS in London are running a public awareness campaign #AskAboutAsthma to encourage small steps to improve the quality of life for children and young people living with asthma.

Keeping children's asthma under control is particularly important this year due to the coronavirus and any potential second wave. The theme of the 2020 campaign is #AskAboutAsthma. In the time of Covid-19.

The #AskAboutAsthma campaign wants to encourage health professionals, children and young people and their families to take three simple effective measures to help them control their asthma. They should:

- Have an asthma management plan
- Be able to use their inhaler effectively
- Have an annual asthma review (or a virtual)

Running from 14 to 20 September, it will include a week-long schedule of webinars, podcasts, blogs, social media activity and a virtual conference on Wednesday 16 September (am). Each day will have a focus, such as primary care, pharmacy, schools, nurses, air quality and parents and families.

2020

This year will be the third year I have participated in the Ask About Asthma campaign. For me it's an important campaign because, it raises awareness that having asthma doesn't have to mean having to limit a child.

I want every child with asthma in NCL to fulfil their potential, irrespective of their long-term condition and the best way they can do this is to be in control of their asthma. As such, I

Supporting families of children living with asthma through the lockdown

I was able to contact families, who had previously not attended my clinics, and complete consultations over the phone. Families had time to talk and if they were not available at that time, it was easy to rearrange. I encouraged the parents to involve all family members for family education.

2020

I am very excited to once again to be part of the fantastic Ask About Asthma campaign, led by Healthy London Partnership and supported by North London Partners in Health & Care, running from next week the 14th - 20th September 2020.

September is the perfect time to remind ourselves about the key messages for good asthma care as it coincides with returning to school and is also notably, the month where hospital admissions for asthma increase.

[More »](#)

Preventing an asthma attack in children and young people 5 key points for parents and students

1. Use a preventer inhaler with a spacer every day even if asthma is good.
2. Always use a spacer with the inhaler to maximise even distribution of the medicine to the lungs
3. Remember to pack the asthma care plan spacer and blue inhaler into school bag for use in school
4. Have an annual review with your GP or Nurse
5. Hand in asthma care plan to the school office

Correct inhaler technique

- Remove caps from the inhaler and spacer. Shake the inhaler and insert into the base of the spacer.
- Breathe out gently as far as is comfortable. Put the mouthpiece of the spacer into your mouth and seal your lips around it.
- Press the inhaler once to release a dose of medicine. Breathe it slowly.
- Encourage the child to breathe in and out slowly and gently for 3 breaths, (if you hear a whistling sound they are breathing in too quickly).
- Withdraw the mask from the child's face.
- All taking another dose, wait 30 seconds and repeat steps 1-4. Replace mouthpiece cover after use.

#AskAboutAsthma Campaign - 14 to 20 September 2020

Next steps

Working with ICSs to increase the number of Local Authorities involved with #AskAboutAsthma

#AskAboutAsthma can be promoted throughout the year:

- Start of hayfever season in April reminding that pollen is an asthma trigger
- World Asthma Day in May
- Working with schools to remind CYP about good inhaler use over summer holidays June/July
- Clean Air Day in October (this year 85K impressions with #AskAboutAsthma and #CleanAirDay promoting HLP's air quality resources and linking to asthma)
- At the start of the flu vaccination period October/November
- Supportive material launched when there is an asthma death and inquest

Conclusions

- Feedback shows that the campaign was very well received. All CCGs and STPs were involved
- Attendees welcomed the fact that #AskAboutAsthma took place, was well planned and executed despite the current circumstances
- Participants appreciated the whole system focus and wider MDT involvement (e.g. pharmacy, physiotherapy)
- There are clear benefits of holding the events virtually which will be explored in future years
- The campaign allowed greater engagement due to the variety of content (podcast, webinar, blogs and social media) much of which was new to the campaign. This approach also allowed more voices to be heard
- Flexibility of the approach meant that webinars could be held at more accessible times. For example the pharmacy webinar was held in the evening
- More content has been generated than in previous years. There has been positive feedback that all content, including slides and webinar recordings, is available on the HLP website
